

**Company Overview:**

WesTech eSolutions is a Veteran Owned Small Business (VOSB) centrally located in Northern Colorado. We have over twenty years experience providing conversion services and document management solutions.

Whether you need simple scanning, conversion of legacy electronic formats, ocr, classification, capture of electronic data, capture of cursive handwriting, constrained and unconstrained handprint, signature verification, supporting hardware or software, training, consulting or full scale implementation of an enterprise information management solution. WesTech has the capability to provide it.

Our capabilities and experience makes us a one-stop shop for all your enterprise information management needs.

**Products and Services:**

WesTech features a number of document management related products from partners that were carefully chosen for quality of their organization and price performance.

eFraud Solution, a unified software solution for check fraud detection,

provides the ability to process business and personal checks for check stock verification, check recognition and signature verification into one unified, easy-to-use solution.

We have formed alliances with companies that provide award winning leadership products which enhance our ability to create efficient and cost effective solutions. We offer products and services from:

- ◆ M-Files Inc.
- ◆ Parascript LLC

Our services are performed by staff with over twenty years experience in data/image capture and document management solutions.

Our product scanning lab contains high speed color duplex scanners. Our scanning personnel all have been trained to provide fast, error-free paper or data conversion.

**Facilities:**

We maintain a 800+ Sq. Ft. facility with expansion capability, located in Longmont, CO.

FAX: (720) 306-7163

**Join The Movement:**

Reduce the effort required to manage vital information! Many studies have shown that employees spend a great deal of time trying to find information that is already available within the organization. The time spent on searching, sorting, creating and re-creating redundant documents might account for a large amount of wasted hours. Such inefficiencies can be eliminated with the use of a well designed Document Management Solution and Conversion strategy.
